## Hotspot Hits for February 20, 2004

By [Wi-Fi Planet Staff](#)

- The Detroit Free Press says that two groups are trying to catalyze community wireless networks in the Motor City. The first is called [Detroit Wireless Project](#) and will be holding meetings downtown to brief groups on the ease of setting up a hotspot. The other is [DetroitCONNECTED](#), which wants to get hotzones into poor neighborhoods. They're going to connect some low-income families to the Internet by the end of March, with some churches in the Warren-St. Antoine neighborhood to follow. -- February 20, 2004

- Earthlink ([Quote](#), [Chart](#)) might finally be going wireless as an ISP (beyond what it has with partner Boingo). The Sacramento Bee in Calif. reports that the company is teaming with [Digital Path Networks](#)

- Minnesota based WISP [Wi-Fi Guys](#) is providing hotspots in a couple of new hotels in Michigan: the Hampton Inn and the Holiday Inn Express, both in Holland, Mich., off of US Route 31. To log in, users just get a password when they sign in at the front desk. Both hotels are owned by [Suburban Inns](#). -- February 17, 2004

# 3Com® Wireless: Make the Smart Choice

## CISCO MOBILITY FAST TRACK

### Preparing for Wireless LANs

The article lays out the considerations for preparing an enterprise WLAN. Documenting user application and bandwidth requirements, choosing the appropriate technology and products, and completing a comprehensive site survey prior to installation will help you deploy a wireless network that meets or exceeds your company's -- and your users' -- greatest expectations. Included are a site survey checklist and sample of an "outside in" site survey method. [Register to download.](#)
